SOME OTHER THINGS TO KEEP IN MIND:

- Don't discuss activism while observing, photographing or recording ICE.
- Don't post photos or videos on social media that show the faces of people being detained.
- As part of our goal to keep our neighbors safe, we want to make ICE feel uncomfortable and to send a clear message that they are not welcome in our communities. Observing, photographing, and recording them is a powerful way to show resistance. The more visible and unwelcome their presence becomes, the less desirable it will be to work for ICE - making it harder for them to carry out arrests.
